PROFESSIONAL SUMMARY

I am a curious and passionate Computer Science student, who is always eager to find solutions, get involved in new and exciting projects, and discover the inner mechanisms of things. I have the ability to learn new information quickly and thoroughly, to think logically and critically, to work patiently and systematically, but also to experiment and learn from my mistakes. My working style can be characterized by flexibility, responsibility, involvement, and precision. I am looking for a challenging academic and professional environment that would allow me to learn something new every day, test my knowledge, develop my skills, and put them to practical use.

EDUCATION

Saveetha Engineering College

B.Tech in Computer Science and Engineering

Anticipated May 2027

CGPA: 9.32

EXPERIENCE

NetworkGeek

Data Scientist Intern

Aug 2025 – Oct 2025

Chennai

- Processed and cleaned large real-world datasets (50K+ records) using Python, Pandas, and NumPy, improving data reliability and enabling accurate statistical analysis and model development.
- Developed and evaluated machine learning models using Scikit-learn, gaining practical experience with Neural Networks, Transformers, and Large Language Models (LLMs) for predictive and analytical tasks.
- Automated repetitive data preprocessing and feature engineering workflows using Python, reducing manual processing effort and improving overall analysis efficiency.
- Collaborated with cross functional teams to analyze datasets, interpret model outputs, and generate actionable insights, improving decision making and technical troubleshooting processes.

PROJECTS

ArtyFacets – Music Workshop Booking Platform

Figma, TypeScript, Next.js, React, Node.js, Express.js, MongoDB, Postman, Git ([GitHub](#)) ([Live Site](#))

- Built a full-stack music workshop booking platform, enabling users to discover and book workshops across 100+ events with 99% data consistency.
- Designed and implemented RESTful APIs for booking, authentication, achieving sub-200 ms API response times and ensuring efficient backend communication.
- Developed a server-side rendered frontend with Next.js, improving page load performance by 35% compared to traditional client-side rendering.

Smart Connect - AI Powered LinkedIn Networking Assistant

JavaScript, Chrome Extensions API, OpenRouter API ([GitHub](#))

- Developed a Chrome extension that generates personalized LinkedIn networking and referral messages using LLMs based on extracted profile information.
- Built content scripts to extract profile details from the webpage DOM and implemented Chrome runtime messaging for seamless communication between the extension popup and content scripts.
- Integrated the OpenRouter API to generate context-aware outreach messages tailored to extracted profile information and user-selected networking goals.

SKILLS

- **Expertise:** Software Development, Data Structures & Algorithms, Exploratory Data Analysis (EDA), Web Development, Database Management
- **Languages:** Python, Java, C, C++, SQL, JavaScript, HTML, CSS
- **Frameworks & Libraries:** React.js, Node.js, Express.js, Next.js, Scikit-learn, Pytorch, TensorFlow, Pandas, NumPy, WebSockets
- **Databases:** MongoDB, MySQL, Oracle Database
- **Tools:** Git, GitHub, Postman, Jupyter Notebook, Google Colab, VS Code, Android Studio

CERTIFICATIONS & ACHIEVEMENTS

- Machine Learning – Certificate of Merit, Summer Analytics 2026, Consulting & Analytics Club, IIT Guwahati (Top 25 percentile, 6-week program) ([Certificate Link](#))
- Aviatrix Certified: Multicloud Network Associate ([Certificate Link](#))
- Oracle Database SQL Certified Expert ([Certificate Link](#))
